

OBJECTIVE

Enthusiastic graduate seeking to start a career as an entry-level software engineer wherein I can utilize my expertise in the domain which I gained for the substantial growth opportunity for the company and my career.

Known to prioritize and coordinate the tasks according to the weightiness of deadline and always have a motive and guided charm to keep encircle inspired.

TECHNICAL SKILLS

Core Java
Spring Boot
Python
Basics of Cloud
Microsoft Excel

PROFESSIONAL SKILLS

Active listening
Interpersonal skills
Time Management
Collaborations

ASPIRING ENGINEER

INTERNSHIP EXPERIENCE

Flatirons Solutions – Intern Technical Writer

12/9/2022 – 31/3/2023

- As an intern, I worked in Admin position and coordinated the work allocations, source download for authoring and moving the DMC to final delivery check. I was part of the CSLE team; together we worked on projects to accomplish the deliveries count within the deadline.
- During the internship the encounters allowed me to develop Excel to Analysis the work allocation and combined efforts with the team, we overcame the challenges and gained more confidence in myself. Overall experience was positive, and helpful for my career.

PROJECTS

Field Study on Preparation of Engine Maintenance Manuals

- The EMM plays a crucial role in ensuring safe and reliable operations of aircraft engine. Where I will download the change drive and define the source (SDD) if there wasn't one and start the Authoring process using SGML.
- My part of the work will be Analysis and break it down to multiple data units called DMC which will tell the authors from which model to where to find it and process it to S1000D standards to Illustration team.

CRUD operation on Bike showroom and Movie Portal on Spring Boot JAVA

- The main objective of this project to create a server-side to store the details from the user using Spring Boot. This project worked using the CRUD operation and executed under OOPS concept where it can Create Read Update and Delete the data in the server and can be done with SQL queries also.
- Also the Rest controller for Rest API is created in for mapping of JSON to share the resources while maintaining control and security who gets access. This project is based on MVC structure of Spring Boot. So in these projects we can work on CRUD and Rest Controller to store, and share data without security issues.

CERTIFICATES

Full Stack Java development by Credo Systemz
Fundamentals of Digital Marketing by Google
AWS Cloud Practitioner Essentials by Amazon
Machine learning with Python by Free code camp

ACHIEVEMENTS

Won 3rd place in Football Tournament conducted in sport event
Participated in an Drone event and been a member of Aviation club
Participated in Avadi Night Marathon for 5 Km and won Medal.
